What our Customers are Saying

★ ★ ★ ★ ★ I have used Print Ready for a number of years now and i have been very satisfied with all the projects undertaken by them for our business Cascade Construction. We have had many advertisements done including van signage for our fleet of vehicles, office signage, stationary and more. I will be a returning customer for many years to come.

★ ★ ★ ★ Print Ready did my van signs for me a few years ago. They did a great design for my business with a logo and nice pictures. I found Gary, Neto and Alex very easy to deal with and their price was good. Ive since gotten magnetic van signs for my second van and I have no complaints.

recommend Print Ready for printing, no bother. They did a class job for me. I had no look at all at the start. They did my vans, tee-shirts, flyers and invoice books. The whole lot looks very professional and lve gotten a lot of compliments about it. Sound to deal with. 100% recommend.

File Types

To make ordering your print as stress free as possible we accept four different file types:

PDF | JPEG | TIF | EPS

To get the very best results for your print, we recommend supplying your file as a PDF in a CMYK colour space.

Top Tips

Registration

Registration means that your front backs up correctly with the back of your printed job. In order to ensure your order holds registration, be sure to include cut and crop marks in your artwork.

Vectors and Rasters

Raster files are like photos. Vector files are like logos. Vectors can scale up without loosing any resolution. If using vector graphics, be sure to outline and expand all vectors before saving.

Wide Format Printing

Graphic Design

Print Ready provide a wide range of high quality print and design services to businesses and organisations that want results at competitive prices.

Proof Reading

The best tip we can give you is to proof read thoroughly. Check, check and then check again. If you have access to a printer, we suggest printing out your design so you can proof read from a hard copy.

Ensure all fonts are embedded into your document for accurate printing. Also, check your preview carefully to ensure all text is visible and accurate.
