

Beer mat ø103mm

Bleed: is the zone outside the trim area. After trimming, the bleed ensures that no unprinted edges occur in the final trimmed document

Trim: is where the product will be cut.

Safetymargin: is the zone inside the trim area. Be sure that important elements which are not to be cut, are placed within this area

Attention: remove this layer before sending.

- Pictures in CMYK modus
- Resolution: 300 DPI
- Fontsize: at least 7 points
- Fonts: convert fonts to outlines
